Fuel	Petrol
Top speed	40 knots
Hours	Approx. 180

Length	41 ft
Beam	346 cm

Hull material	Fiberglass
Color	White
CE category	B/C – 10/12 pers

CAPACITIES

Berths	4
Heads	1

The Nimbus T11 is one of the most refined daycruisers in its class. The model is renowned for solid build quality, excellent seakeeping, and a spacious layout. This 2022 example, launched in 2023, comes with a high level of equipment and is in very good condition.

The boat is powered by twin Mercury Verado V8 300 hp engines with a combined 600 hp, and has approximately 180 hours as of June 2026. Zipwake autotrim ensures optimal trim underway, while bow thruster and anchor windlasses fore and aft with remote control make for easy handling in port. The boat has been stored indoors during winter and all service and maintenance has been carried out professionally.

Flexiteek G2 decking throughout the entire boat gives a refined appearance that is easy to maintain. Cushions and sunpads on the foredeck, a large bimini top and harbour cover are included. The swim platform is fitted with two large refrigerator compartments.

A gas cooktop, a freezer in the storage compartment, and two refrigerator drawers in the galley provide excellent options for food preparation and storage. Tableware for 6 persons is included.

Both cabins are equipped with mattress toppers. Webasto heating with hot water and a defroster make the boat suitable for use outside the peak season. We are impressed by the choice of materials and the quality of the interior. There is no doubt that this truly is a premium vessel.

A Simrad 16" chartplotter with echo sounder and Simrad VHF with AIS receiver cover the navigation requirements. The Fusion stereo system has been upgraded with a subwoofer and additional speakers.

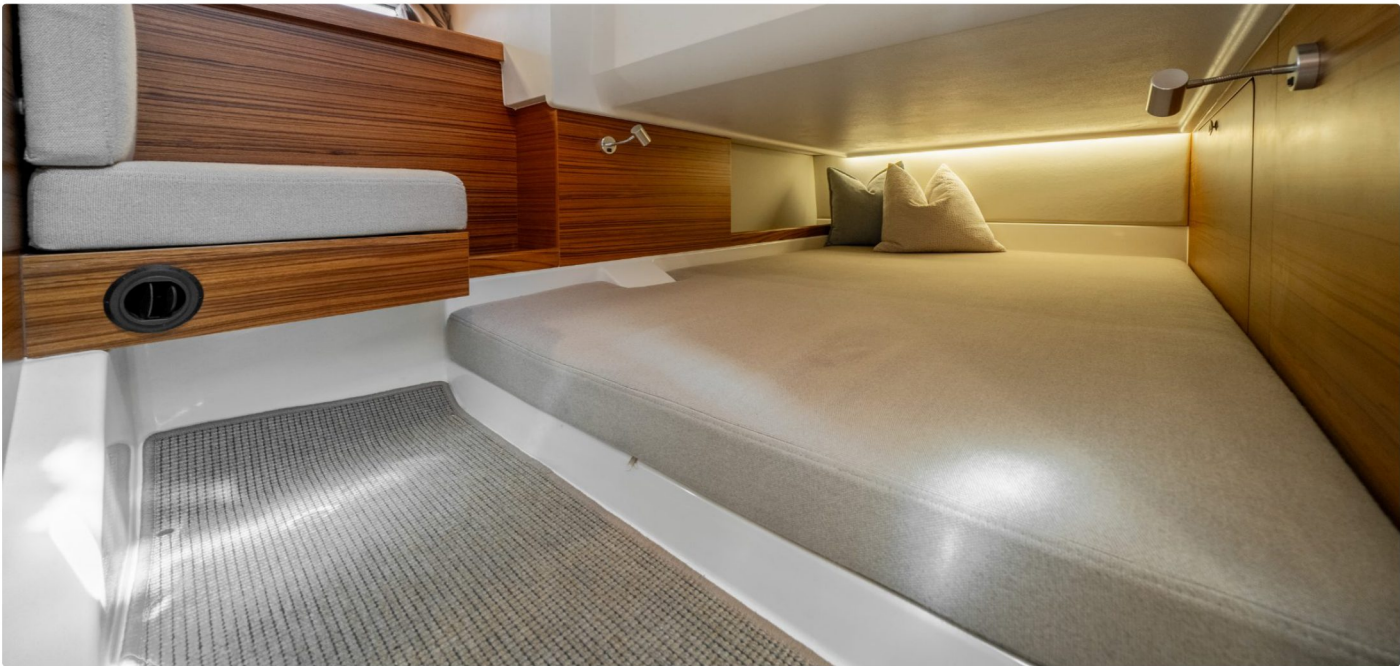

A 300 W solar panel package combined with a large battery bank, shore power and battery charger provide ample electrical capacity at anchor. Mooring package included.

The boat is available for viewing and handover in Sandefjord. Contact us for the full photo package and to arrange a viewing.
